**Regional Evacuation Suggestions for Lee County Residents**

If an evacuation is recommended, these are suggested destinations in Florida:

**Southwest Florida Impacted by an Approaching Hurricane from the Gulf:**

- Leaving early – head to Central Florida.
- Leaving late – head to Southeast Florida

**Tampa Bay Area Impacted by an Approaching Hurricane from the Gulf:**

- Leaving early – head to Southeast Florida.
- Leaving late – head to Southeast Florida, or stay in county, away from the Coast.

**Hurricane Crossing the State (East to West), Impacting Lee County:**

- Stay in Lee County, away from the Coast.

**Hurricane Moving Parallel to Southwest Florida, Impacting Lee County:**

- Stay in Lee County, away from the Coast.

**What Does This Map Mean To You?**

**Evacuation Zones**

The bold squiggly lines are main roads in Lee County, also designated as Evacuation Routes. We use these roads to create familiar boundaries on the map. In doing so, we overlay the Storm Surge Map and force the Storm Surge Map to fit these boundaries.

Dividing the map in this way allows us to create a built-in safety margin for each Evacuation Zone. Population and Evacuation Clearance Times influence the configuration of Evacuation Zones.

**Evacuation Clearance Times**

This is the time necessary to safely evacuate residents and visitors, based on behavioral assumptions and evacuation scenarios, from the point when the evacuation order is given until the last evacuee can either leave the evacuation zone or arrive at safe shelter within the county. Remember more than just your zone may be evacuating at the same time.
